FAA Safety Briefing

Sharing the Skies Safely | May/June 2021. The May/June 2021 issue of FAA Safety Briefing focuses on the FAA's integration strategies for new entrants and emerging aviation technologies in the National Airspace System (NAS). Articles cover some of the regulatory changes and technological solutions that will help enable the safe and seamless operation of these new NAS entrants as they share the skies with traditional airspace users. We'll also look at how the FAA is helping to inform, educate, and inspire the next generation of NAS users.

01 Doc 10150. Manual on the Functional Specifications for the Location of an Aircraft in Distress Repository (LADR) First Edition, 2021

The purpose of the functional specifications for the Location of an Aircraft in Distress Repository (LADR) is to define the requirements for a centralized repository of location information resulting from activations of aircraft distress tracking systems. The Repository enables operators to meet the requirements of Annex 6 — Operation of Aircraft, Part I — International Commercial Air Transport — Aeroplanes, Chapter 6, 6.18.3

Doc 10151. Manual on Human Performance (HP) for Regulators

First Edition, 2021

This manual highlights the importance of integrating human performance (HP) considerations in the development of ICAO Standards and Recommended Practices (SARPs) and in States' associated regulatory activities. It supports

regulators to make it easy for people in the aviation system to do the right thing and avoid negative safety consequences. T
