01. Alaka'i gains second FAA experimental go-ahead

Skai is a four-seat hydrogen-powered hexacopter.

US hexacopter developer Alaka'i Technologies has received FAA approval to flight test its second experimental Skai vehicle.

It carries a double-walled tank of liquid hydrogen that is kept under low pressure at -423 degrees Fahrenheit.

Early designs were to be powered by batteries but would only allow 15-20 minutes of flight time in the air, so the company instead focused on fuel cells, which became more prominent in automotive applications.

02. Skyports and CAAP team up for Latin

Skyports and CAAP team up for Latin American vertiport development Thursday, 8 December 2022

The partnership between the two companies is an important step in the growth of the AAM industry in Latin America and supports the development of operationally critical vertiport networks.

03. Azerra goes from green dream to exchange scheme

Azerra helps companies navigate responsible management paths to net zero an online spot trading carbon market exchange.

Azerra will also offer instant access to carbon markets and SAF while using blockchain technology to deliver full transaction and reporting transparency.

04. Global Air Charters completes first reforestation initiative.

Global Air Charters chose to coordinate the plantings through MNDNR's Future Forest Fund, which allows Minnesotans to contribute to reforestation projects across the state.

In this programme, MNDNR staffers identify areas in need of reforestation that may have been affected by disease, pests, fires, storms, and other disturbances.

The programme ensures funds are spent planting, growing, and protecting trees in Minnesota's state forests
